

Embedded electric heating uncovered

A free technical seminar on the safe design, installation and verification of indoor and outdoor systems

 **SELECT**

 **FLEXEL**

Two industry experts. One hot topic.

Heating cables and
embedded heating systems

- Overview of Section 753 of BS 7671:2018+A2:2022
- Design, installation and initial verification of embedded heating systems for surface heating
- Introduction to electric heating, de-icing systems, frost protection and similar embedded applications
- Guidance on both indoor and outdoor systems

Internal and external
heating solutions

- Overview of heating products currently available
- Scope and locations for successful product use
- Types of cable, including underfloor, in-screed, foil mats, ice prevention and pipe freeze protection
- Walkthrough of 10 heating systems

- 📍 **Tuesday 7 May 2024:** SELECT, Edinburgh
- 📍 **Tuesday 28 May 2024:** SECTT, Cambuslang
- 📍 **Wednesday 5 June 2024:** Flexel, Glenrothes

Runs from 8.45am to 1pm ● CPD certificate provided

Cost: Free for SELECT Members
