

# Training

---

**Scottish Building Standards  
Current ACC – 3 year renewal (408)**

---

## Overview:

This self-study programme and open book assessment is intended for electrical installers who are already registered as Approved Certifiers of Construction (Electrical Installations to BS 7671) in the Scottish Building Standards Certification Scheme. This self-study and assessment meet the three yearly update training requirement as set out in the Certification Scheme.

Note: This programme is only open to Registered Approved Certifiers. New entrants to the Scheme are required to complete a more in-depth assessment.

## Aim:

To provide the necessary information for an Approved Certifier of Construction to remain up to date with current Scottish Building Standards Guidance and Legislation. This self-study is designed to be flexible.

## Content:

- Introduction to Scheme
- Introduction to the Technical Guide
- Structure & Fire
- Environment, Safety & Noise
- Energy
- Sustainability
- Certification

## Format of programme:

On booking, candidates will be e-mailed the course notes along with a link for the open book assessment.

It is estimated that the pre-study of the course notes will take approximately twelve hours and can be completed in stages at a time that suits the individual.

Once the pre-study has been finished, there is a multiple-choice assessment with 25 questions that needs to be completed.

If the candidate is successful in passing the programme they will be issued with a certificate.

**This programme must be completed within one month from the date of booking.**

### Delivery:

This is a self-study programme completed in your own time with an open book assessment completed after pre-study.

### Fees:

SELECT Members - £75 + VAT (£90)

Non Members - £90 + VAT (£108)
