**Scottish Building Standards
New Approved certifier of Construction
(ACC) (216)**

Excellence in Skills

216

Overview:

This self-study programme and open book assessment is part of the requirements for all electrical installers who intend to register as an Approved Certifier of Construction (Electrical Installations to BS 7671) under the Scottish Building Standards system.

Aim:

The self-study and assessment are intended to provide the necessary information and guidance to enable an Approved Certifier of Construction to understand the scope of the new Building (Scotland) Regulations 2004 and associated Standards, to properly certify the work of their Approved Body.

Content:

1) SELECT Registration Scheme

- Scottish Building Standards Division (BSD)
- Details of the scheme
- Scheme Membership
- Criteria for duties of an Approved Body
- Criteria for duties of an Approved Certifier of Construction
- Code of Conduct

2) Building Standards applicable to Electrical Installations

- Structure of the building
- Fire Safety
- Environment
- Safety
- Noise
- Energy Conservation
- Certification

Format of programme:

On booking, candidates will be e-mailed the course notes along with a link for the open book assessment.

It is estimated that the pre-study of the course notes will take approximately twelve hours and can be completed in stages at a time that suits the individual.

Once the pre-study has been finished, there is a multiple-choice assessment with 40 questions that needs to be completed.

If the candidate is successful in passing the programme they will be issued with a certificate.

This programme must be completed within one month from the date of booking.

Delivery:

This is a self-study programme completed in your own time with an open book assessment.

Fees:

SELECT Members - £75 + VAT (£90)

Non Members - £90 + VAT (£108)
